

OIR 2324/899

17 May 2024

Tēnā koe [REDACTED],

**Request for Information under the Local Government Official Information and Meetings Act 1987 (the Act) (the LGOIMA)**

Thank you for your email of **24 April 2024** requesting the following information:

***I [REDACTED] have been taking a keen interest in the Takutai Kāpiti project, including reading all of the technical reports. In the recent material produced for April 2024 consultation, there are summaries for each of the adaptation areas and pathways that contain pathway costs, damages avoided and residual number of properties still exposed. However, there is no supporting report that explains how the pathway line item costs were developed, how the damages or damages avoided were calculated over time, or when the costs were assumed to be incurred in relation to avoiding a subset of damages. Please can you provide the engineering and economics reports that explain how the pathway costs and damage calculations have been developed, including their assumed profiling over time.***

The Economic Report detailing pathway costs and setting out the methodology for determining those costs is now available on the [Documents page](#) (under 'Volume 3' heading) of the Takutai Kāpiti website. For ease of access, the direct link to this report is [Economic Analysis of Takutai Kāpiti Short-listed Coastal Adaptation Pathways](#)

Ngā mihi,

**Kris Pervan**

Group Manager Strategy and Growth  
Te Kaihautū Rautaki me te Tupu
